MainPage Overview

Overview Main Page

- **Start the Photobooth:** Access the Setup Initialization Page, afterwards you can start the End-customer Loop.

Management-Systems: Only accessible with the purchase of the Partner or Corporate package. If not, only template events are selectable.

- **Filter management:** Get an overview of all available Filters & Styles.
- **Event Management:** Create your own event with self-chosen AI-Filters which should be used during your event.
- **User management:** Set up own logins for your users (e.g., end customers) and link them to specifically created events (including defined AI filters).
- **Gallery:** The place to see all your created images, as well as Bulk Download Options.
- **Language Options:** Choose your language, which will be automatically translated. This option translates all pages visible to the End-user (all pages after “Start the Photobooth”).

Explanation: Branding Possibilities

Overlay functionality: Enhance your transformed images with our overlay feature, perfect for adding branding elements like frames and logos. Simply upload a PNG file with a transparent background to ensure the main image remains visible.

- **Supported Framesize: 1152×768**

Banner functionality: Our banner feature allows you to add a custom image above or below your transformed image, offering additional branding or decorative opportunities. Upload your banner image and preview it to ensure it aligns with your vision. While any resolution is acceptable, we suggest using a size of 768×200 for the best balance and visibility.

- **Supported Framesize: 768×200**

Overview User Management

The User Management offers the possibility to create subusers (which you then can link spec. events to). Subusers have their own Login-Credentials and no Access to the Management functionalities.

1. **Email:** A field to enter pot. user's email address
2. **Password:** Define the password for the subuser
3. **Role:** The user-role can be used to share Access with your workers or pot. clients (if you, as a event organizer are not onsite).
4. **Paid-Status:** During the Paid-Status subuser has access to the "Start Photobooth"-Button.
 - a. **Paid Status From:** Define the Starting-Access for the created subuser (the standard time zone is CET)
 - b. **Paid Status To:** After the Paid-Status ends, users can only access the Gallery. (the standard time zone is CET)
5. **Save User:** Finish the creation process by selecting the to "Save User"-Button. If not, the information won't be saved.

The screenshot shows the 'New User' form within the 'Listing Users' section. The form is titled 'New User' and includes a subtitle 'Use this form to manage user records in your database.' The form fields are: Email (text input with 'testuser@test.com'), Password (password input with masked characters and a toggle icon), Role (dropdown menu with 'user' selected), Paid Status From (date-time picker with 'TT. MM. JJJJ, --:--'), Paid Status To (date-time picker with 'TT. MM. JJJJ, --:--'), Created (date-time picker with 'TT. MM. JJJJ, --:--'), Updated (date-time picker with 'TT. MM. JJJJ, --:--'), and Confirmed (date-time picker with 'TT. MM. JJJJ, --:--'). A 'Save User' button is located at the bottom of the form.

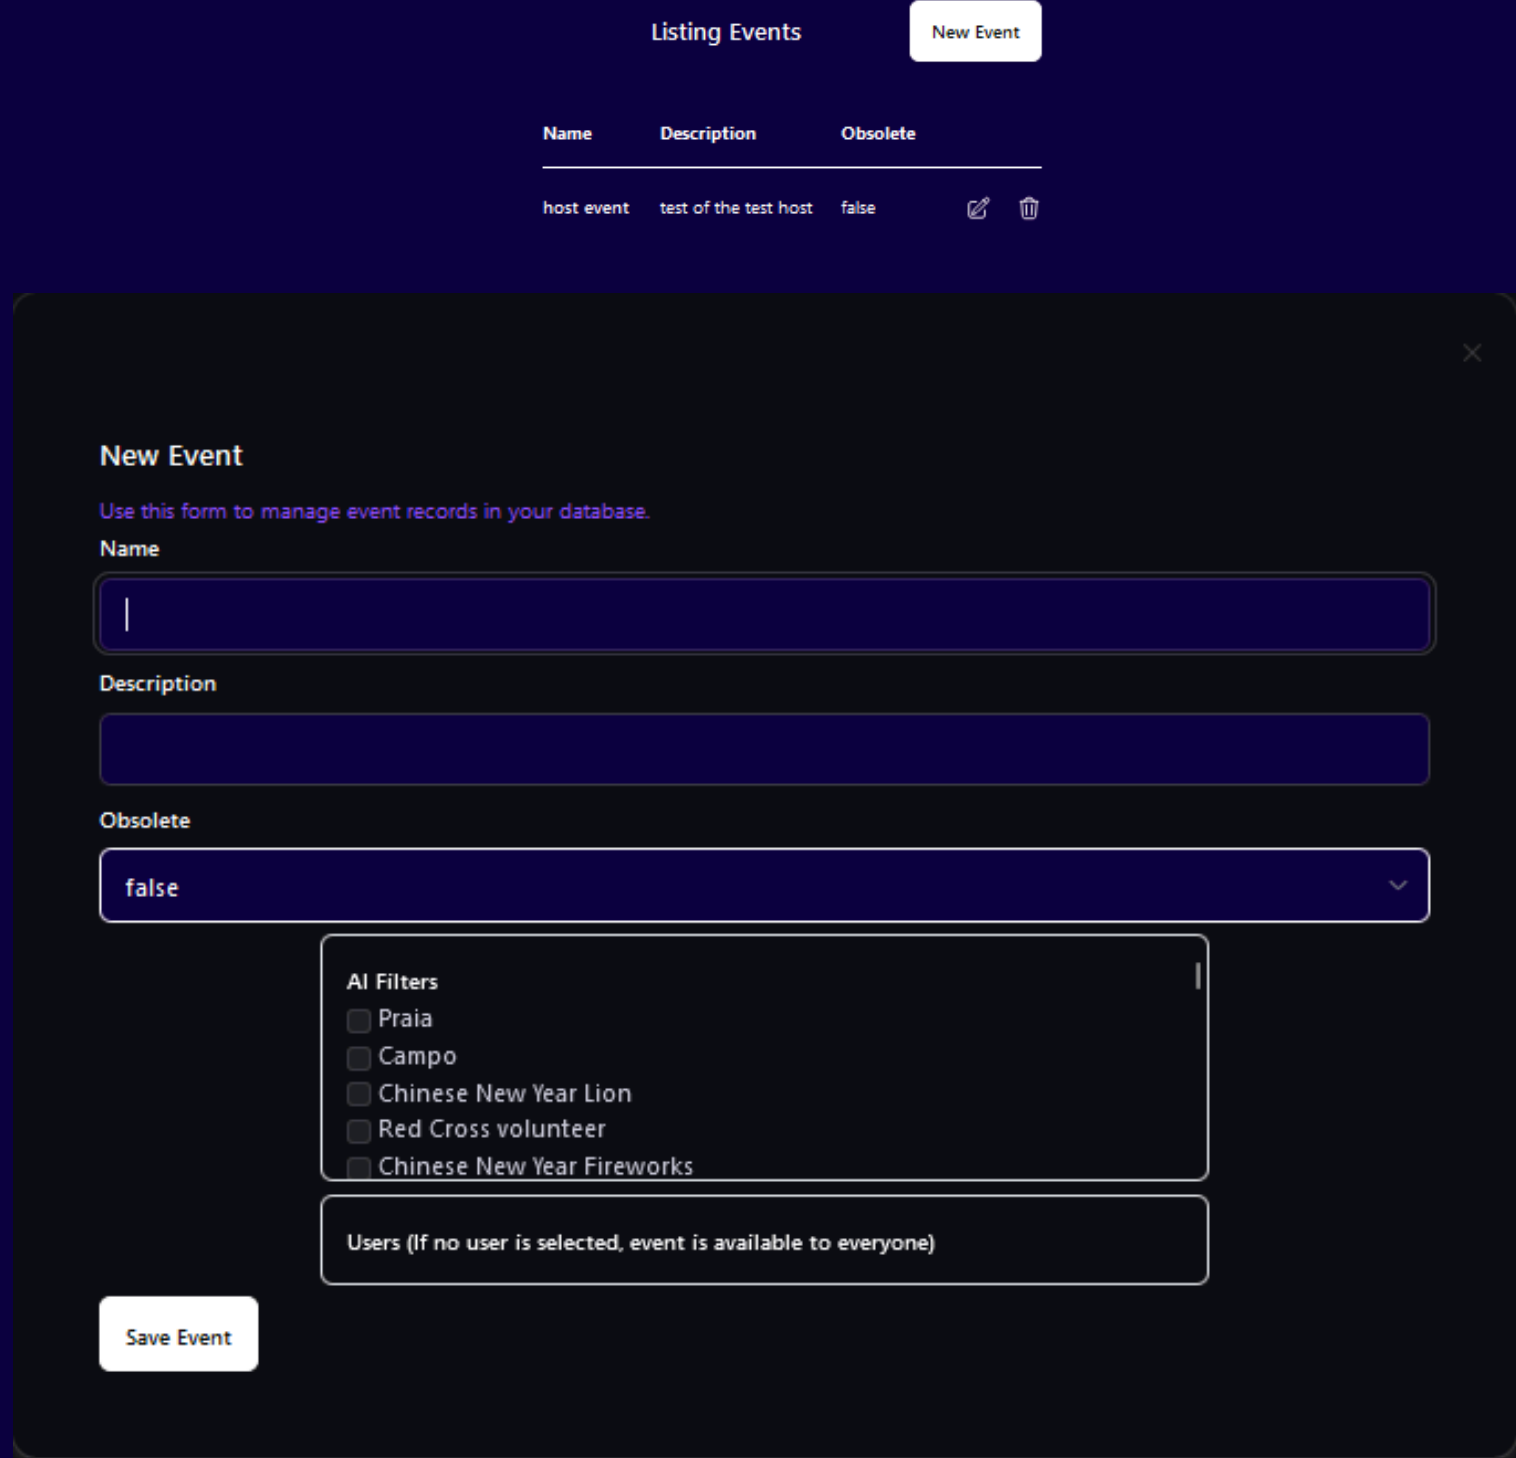

The User Management during the creation of a subuser (by using the "New-User" - Button)

Overview Event Management

The Event Management feature offers you the possibility to create your own events with AI-Filters that you define. To create a new event, use the "New Event" button.

- **Name:** Define the name of your event.
- **Description:** This text field allows you to provide additional information for yourself or your sub-users.
- **Obsolete:** This option gives you the ability to hide specific events that have been created. Event with "Yes" hides the spec. at the "Setup Initialization"-Page.
- **AI Filters:** Choose from our list of Standard or potential Custom AI Filters by selecting the appropriate checkboxes.
- **Users:** Select your created sub-user(s) to define who is allowed to see and use the event. Sub-users can be created in the User Management section. If no user is selected, the event will be accessible to all your sub-users.
- **Save Event:** To store your chosen options, click the "Save Event" button. If not, the information will not be saved.

NOTE: Please don't select more than 8 filters per event.

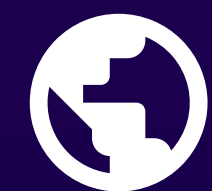

The screenshot displays the 'Listing Events' page with a 'New Event' button. Below the button is a table with columns 'Name', 'Description', and 'Obsolete'. The table contains one row: 'host event', 'test of the test host', and 'false'. Below the table is a 'New Event' form. The form has a title 'New Event' and a subtitle 'Use this form to manage event records in your database.' The form contains the following fields:

- Name:** A text input field.
- Description:** A text input field.
- Obsolete:** A dropdown menu with 'false' selected.
- AI Filters:** A list of checkboxes with the following options:
 - ☐ Praia
 - ☐ Campo
 - ☐ Chinese New Year Lion
 - ☐ Red Cross volunteer
 - ☐ Chinese New Year Fireworks
- Users:** A text input field with the placeholder text 'Users (If no user is selected, event is available to everyone)'.
- Save Event:** A button at the bottom left of the form.
